New 100/300-Hrs MerCruiser gas and Drive Maintenance kits - New V-6 and V-8 Outboard maintenance kits.

Mercury Marine is pleased to inform you that the range of maintenance kits is widening again. Seventeen maintenance kits will be launched to support the MerCruiser gas sterndrive/inboard engines from 3.0L-8.2L. Additionally, ten maintenance kits for the well-known drives (Alpha I, II, Bravo I, II, III for gas/diesel) will be available. For heavy SeaPro users, two L6 Verado outboard 300hr kits are created without anodes. Last but not least, Mercury Marine will launch four maintenance kits for the all new V-6 and V-8 outboards. Thanks to all these kits, the organization of the 100 and 300-hour maintenance tasks will be more convenient.

Maintenance Kits Advantages

- Designed to extend the lifetime of the engine
- Improve a lot the dealers' convenience: less order handling and administration, less storage handling, since all required parts are immediately available in one compact box to start maintenance tasks
- Attractive priced
