

MED

GRUPPO MED

Battelli per nuovi orizzonti

MED stand for **Marine Excellence Development**.

It summarises our focus on **producing boats** that have conquered the market for their excellence; making **safety at sea** a promise.

We design, develop and manufacture **rigid hull inflatable boats** that represent the state-of-the-art of marine pneumatic technology.

Our RHIBs

We offer personalized solutions for sport and professional use. We have an entire division dedicated to the construction of RHIBs for various professional and military bodies, identified by the most well-known brand :

MED DEFENSE

The long experience in the construction of Valiant RHIBs for the group Mercury Marine has allowed us to acquire specific skills to produce high quality boats.

The collaboration between Valiant and MED has given rise to innovative projects that have led to solid, high-performance and safe boats, born specifically to navigate in all sea conditions.

Mission

Based on the knowledge acquired through direct and exclusive relationship with our customers, we are committed every day to make boats more and more performing and safe.

Day by day we combine technological research, innovation and respect for the environment, enriched by the best tradition of Made in Italy.

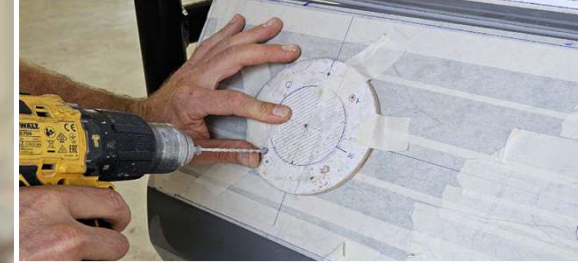

The Tailor Made Company

One of our strengths is the ability of our technical team to realize tailor-made projects that aim at the real satisfaction of the customer's requests.

From the solid foundation of the basic line, carefully and precisely designed to guarantee excellent performance at sea, we can realize the best solution to satisfy the specific needs of the customer.

Thanks to the choice of the accessories and the deck configuration, our clients can be certain to receive a truly personalized boat.

Fishing

The Fishing line is specifically designed to have all the necessary spaces to practice your passion.

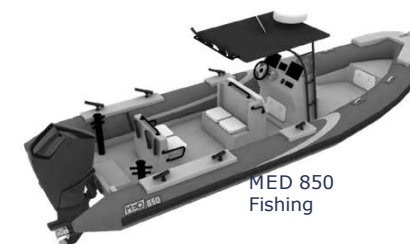

We created this line to let you live your adventures safely in all sea conditions. The personalisation of the deck configuration allows every angler to have the best boat he can imagine.

MED 550
Spearfishing

MED 750
Spinning Extreme

MED 850
Fishing

Diving

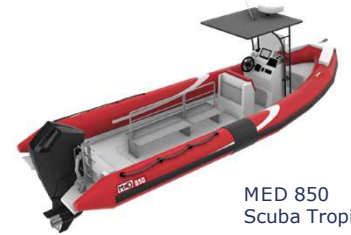

Characterized by large spaces useful for equipment storage, the MED Diving line was born to meet the needs of diving centres and sea workers.

Safe, reliable, intended for the transport of many people, the modularity of the deck equipment makes this rhib functional for every use and situation.

MED 690
Scuba Raiders

MED 850
Scuba Tropic

MED 850
Scuba

Fun

Easy to move, great for a holiday with family and friends, straight away in contact with the sea. It is a comfortable and safe boat, which can also be equipped with engines that do not require a nautical license.

The possibility of adding accessories makes the MED Fun a personalisable boat, usable for pure fun, without sacrificing safety.

Sailing Coach

Practical and safe even in adverse weather conditions, this model is the ideal rhib for assisting sailing teams at sea.

The stern bollards allow pulling the buoys for the race with extreme ease, as much useful as towing the dinghies from the sailing club to the open sea. This rhib can be customized according to the needs of the customer.

Its small size and its design studied with the most important sailing schools, make it the ideal tool for every coach.

The lifeline along the whole profile guarantees an easy grip for the dinghies that approach.

The rhib is also suitable to hoist the flagpole used to simulate the starting phases during training.

Harbor

MED Harbor is the boat designed for sea workers.

Its small size and the jockey console allow carrying out the manoeuvres without losing sight of the port situation.

Equipped with tow bollard and bow bumper, the MED Harbor is ideal for any type of port manoeuvre.

MED SERVICE

The excellence of our work continues through our **After Sales services**. We guarantee rapid and decisive interventions, even on site, together with the maximum customer **support**.

The MED SERVICE teams carry out assistance and modifications on **boats of public and private bodies**.

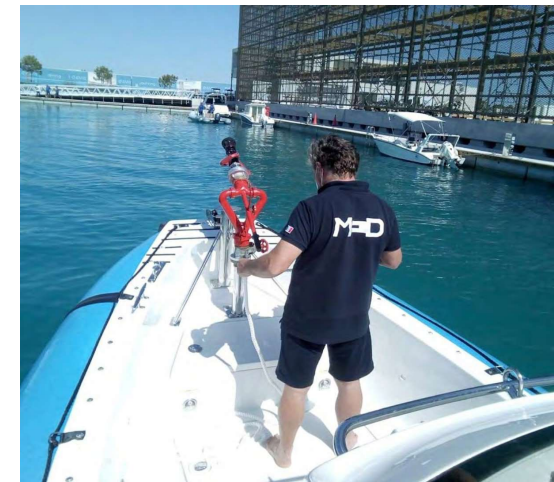

At our headquarters we carry out **retubing, carpentry** and different kind of **refitting**.

Main services

- Washing
- Tube refitting and replacement
- Electrical systems
- Plumbing systems
- Re-motorization
- Trasformations and upgrades

Our technicians can intervene ON SITE, if no structural changes are required.
